

RECRUITING STUDY PARTICIPANTS FOR RESEARCH STUDIES

Our studies aim to investigate potential Neuro-modulation Therapies with the help of an FDA approved drug in individuals with spinal cord injuries.

Your participation will involve a non-invasive, and painless way to stimulate persons with spinal cord injuries, while muscle activity is observed and recorded.

Participants could participate in trials involving:

- Non-invasive Brain Stimulation
- Spinal Cord Stimulation
- Exercise Training
- Flexible Schedules
- **Opportunities for Compensation**

For more information, Contact Sri Ramya Vemulakonda at 312-238-2993 or svemulakon@sralab.org

Principal Investigator: Monica Perez, PT, PhD
The Shirley Ryan AbilityLab (22nd Floor): Neuromodulation Lab
355 E Erie St, Chicago, IL 60611
An academic affiliate of Northwestern University Feinberg School of Medicine.
STU00221545

Qualifying Information:

- Spinal Cord Injury between C2 – L2
- At 6 months post injury
- Complete or Incomplete
- Male or Female
- Ages 18 – 85
